## ***ICE MAKER WATER TREATMENT***

### **Model THF350**

Up to 3000 lbs./day Ice Makers

Water Quality for best Ice Maker Performance

**THF350**

### ***BENEFITS THAT SAVE MONEY***

- Provides continuous ice production
- Reduces ice maker maintenance
- Controls ice maker break downs that require buying extra ice
- Only one replacement cartridge per year
- Built in Multi-stage filtration to prevent premature clogging of filter

*“Solving Water Problems Before They Happen”*

# systems IV<sup>®</sup>

Model THF350 addresses the number one ice maker water problem of hard scale build-up that either reduces ice production or stops ice production. This requires costly ice maker maintenance and usually necessitates buying ice while waiting for the ice maker to return to operation.

Model THF350 also controls other potential ice maker water problems of corrosion, chlorine and sediment.

Model THF350 does not stop bacterial slime and mold growth in an ice maker. Slime can be controlled by adding the affordable Bio-Clean II system to the THF350 filter. The Bio-Clean II also controls more high scale problems in an ice maker. Both the THF350 and the Bio-Clean II systems control most water problems that effect the performance and health considerations of an ice maker.

## SPECIFICATIONS:

Model Number	THF350
<b>Water Hardness gpg</b>	<b>up to 6</b>
Max operating pressure	125 psi
Max operating temperature	100° F
Flow rate (gal. per min.)	7.3
Pressure vessel	PVC
Fittings (NPT)	1/2"
Pre-filter	25 micron
Final filter	5 micron
Activated carbon	food grade
Polyphosphate	food grade
<b>Scale Eliminator</b>	<b>no</b>
Red line gauge	yes
Mounting panel	aluminum
System dimensions	7"W x 26"H
Replacement	THF351
Shipping weight	13 lbs.

Note: water cooled ice makers must connect system to ice maker water only (not to condenser).
