

MBS

SHURflo Water Booster Pumps and Systems

Low, fluctuating or no water pressure can impact drink quality. Water boost systems maintain consistent water pressure to non-carbonated dispensing valves ensuring consistent drink quality.

Flojet® Water Booster Pumps and Systems

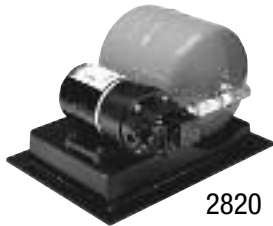

G56

The G56 pump supplies up to 4 GPM (15 L / min) and is capable of CO₂ inlet pressures up to 90 psi. If pumping over 1.7 GPM (6.4 L / min) a pulsation dampener or accumulator tank (K56 Series) should be utilized to reduce pulsation due to momentary shifts in flow requirements. K56 includes a half-gallon accumulator tank. One year warranty.

K56

Standard Model Numbers				
Item	Description	Product Outlet Fitting	Product Outlet Fitting	Gas Inlet Fitting
G56-1212	PUMP WATER BOOSTER 1/2 PRODUCT OUT SS W/CO2 SHUTOFF BRASS FLOJET (small muffler)	1/2" (9.52 mm) barbed straight plastic	1/2" (9.52 mm) barbed straight stainless	1/4" (6.35 mm) CO2 shutoff brass

2820

2820 Series electric pump systems are fully automatic with built-in inlet strainer, pressure switch, and check valve. 2880 has two demand pumps set to different pressures so one pump operates until demand increases. One year warranty.

Standard Model Numbers				
Item	Description	Voltage	Maximum Pressure	Maximum Flow
2820-040	PUMP WATER BOOSTER 115V 70 PSI 3/8 PORT 1 GALLON FLOJET	115 Volt AC	70 PSI (.7 – 4.8 bar)	1.56 GPM at 10 PSI

Duplex II Series highly efficient pump include backflow preventer, check valves, bearing and diaphragm assembly. The diaphragm and valve design can run dry without damage. Duplex II is self-priming up to 8 feet (2.4 m), and I Series is self-priming to 6 feet.

Standard Model Numbers				
Item	Description	Voltage	Maximum Pressure	Maximum Flow
D4834H7011A	PUMP WATER BOOSTER 230V 80 PSI 3/8 PORT FLOJET	115 Volt AC	100 PSI (6.9 bar)	2.2 GPM at 0 PSI
I301050110	QUAD WATER SYSTEM PUMP - FLOJET	115 Volt AC	45 PSI off	3.5 GPM at 40 PSI

McCann's Water Boosters

16-2171

16-1516 Dual Surge Tank

McCann's water boosters have stainless steel tanks and fittings, pre-charged bladders, check valve, relief valve, and brass rotary vane pump. Flow rates up to 100 gallons / hr.

Item	Description	PSI	Size
16-1516	WATER BOOSTER DUAL SURGE TANK 2 WIDE MCCANNS	80-100	28"W x 23.75"D x 18.5"H

Accumulator Tank

21 ounce tank provides consistent water pressure, reduces pump cycling, and minimizes noise. 125 PSI, 1/2" NPT female.

Model	Description
181-201	SHURFLO ACCUMULATOR

Reverse Flow Inhibitor

Strongly recommended for brix pump installations. 100 PSI, 3/8" barb.

Model	Description
84-010-00	REVERSE FLOW INHIBITOR W/FITTINGS

Inline Water Pressure Regulators

Removable, cleanable screen protect pumps, ice makers, drink valves and other beverage appliances from debris and excessive inlet water pressure. Handles water temperature up to 150° F (66° C) and can be mounted in any position.

Water Filtration Systems and Cartridges

Fountain beverages are 83% water, so water quality is essential to serving quality drinks. Water filtration reduces chlorine taste and odor, improper carbonation, off-taste, odor, and harmful cysts (pathogens), plus reduces sediment, abrasion, clogs, down-time, unscheduled service calls and equipment costs. Keep your customers satisfied, your equipment in better condition, and increase your profits with a filtration system.

**Water Filter Systems
Foodservice**

Prefilter removes sediment and particulates before water proceeds to the finer cartridge filters.

Manifold

Valve In Head (VIH)

Cartridge filters vary to meet specific water conditions.

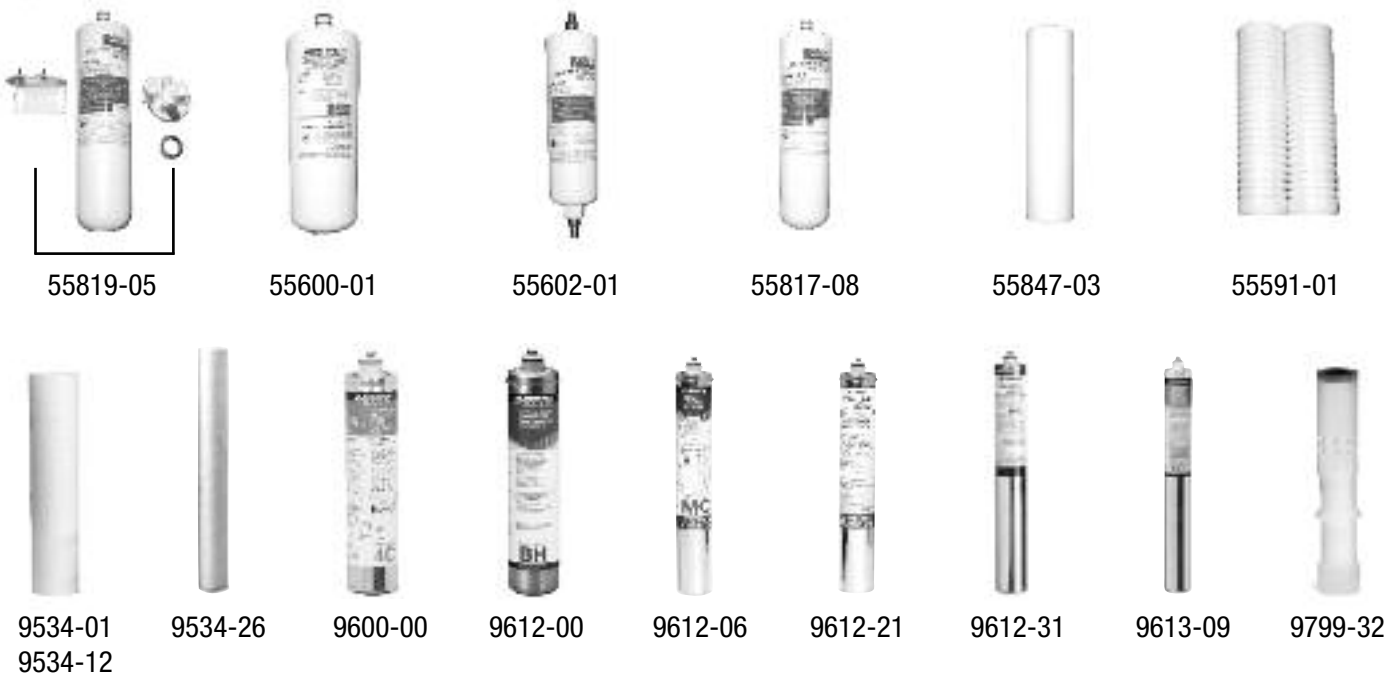

Cuno’s unibody manifold provides parallel flow for higher flow rates, minimizes leaks, and is corrosion resistant. Built-in valve in head (VIH) eliminates the need for alternative shut-off valves, and encapsulated filter reduces the possibility of contamination during change-out. The locking button assures correct installation and prevents accidental removal.

The smaller the micron size, the smaller the holes that the water passes through during filtration. (1 micron is 1/25,000 of an inch. A human hair is about 100 microns in diameter). Cyst filters provide added protection from pathogens such as protozoan cysts.

Item	Description	Micron Rating	Peak Flow Rate	Capacity
